Engineered MATERIALS

Lighter. Stronger. Faster.

Engineered materials research and manufacturing has deep roots in Upstate South Carolina. Building on its rich history in textiles, **the Upstate's advanced materials cluster has seen \$2.1 billion in capital investment and 4,600+ new jobs announced in the last five years.**

Upstate businesses are engineering materials that are solving industry challenges and producing materials for some of the world's most complex products — innovations now found in **Boeing's 787 Dreamliner to BMW's X models.** From surfboards to circuit boards, Upstate companies are making materials that are lighter, stronger, and faster.

“

Deciding where to lay down roots was a big decision, but the partnership offered by state and local officials in combination with access to talent and amenities in the area made it easy. We look forward to growing a world class team and operation in Union County, South Carolina.

FUELING THE CLUSTER

From advancing optical connectivity to pioneering bioresorbables to lightweighting solutions for the automotive and aerospace industries, innovation and engineering are fueling the advanced materials cluster in the Upstate. And, our local research institutions are partnering with Upstate companies to support innovative research and engineering that propel industry forward.

ADVANCED MATERIALS RESEARCH LABORATORY

Clemson's Advanced Materials Research Laboratory (AMRL), a state-of-the-art facility, houses internationally recognized research programs in optoelectronics, chemistry and materials science.

CLEMSON
UNIVERSITY

Available resources include:

- Electron Microscopy Laboratories
- Optical Fiber Drawing Capabilities
- Laser & Chemical Laboratories
- Class 100 Clean Rooms & Instrumentation Facilities

McNAIR CENTER FOR AEROSPACE INNOVATION & RESEARCH

The McNair Center's mission is to support the aerospace industry through education, research and economic engagement, with \$30 million in annual research grants and 100 graduates each year.

Uof SC. South Carolina

Primary research areas:

Advanced Composites

Advanced Air Mobility

Combustion

Automation
